Assembly Time: Approximately 18 minutes

Important: Your Kolpin Glass Windshield Kit is exclusively designed for your vehicle. Please read the installation instructions thoroughly before beginning. Installation is easier if the vehicle is clean and free of debris. For your safety, and to ensure a satisfactory installation, perform all installation steps correctly in the sequence shown. For better cab assembly procedure, install kits in the following order: front window, rear window, and roof.

Installation Instructions:

1. Shift vehicle transmission into "PARK". Turn key to "OFF" position and remove from vehicle.
2. Clean rear surface of glass windshield (item #1) as required, then apply medium foam strips (item #7) and short foam strips (item #8) as shown. Trim seals as required. (See illustrations 1-1 and 1-2). **Note: You can position windshield on a-pillars of cab frame, aligning top edge with visor, then mark with tape or pencil where the cab frame tubes match with rear surface of glass windshield. The alignment marks help locate where the foam strips will be applied.**
3. By firmly pressing with hand, install the bulb trim seal (item #9) onto the front lower surface of the glass windshield (item #1) as shown. Trim seal ends to match up with location as shown. (See illustrations 1-1, 1-2 and 1-3). **Note: The bulb trim seal has metal retainer strip, recommended cutting tool is metal shears/tin snips.**

Installation Instructions (Continued):

4. Place the windshield assembly onto the vehicle, aligning the top edge with the cab frame upper cross member and bottom edge with the dash as shown.

(See

illustrations 1-3 and 1-4).

5. From the front windshield surface, insert M6 screws (item #2) thru M6 washer (item #3) and then thru each of the four slotted hole locations as shown. (See illustrations 1-3, 1-4 and 1-5).
6. 28220 fits with Kolpin aluminum roofs 29230 / 29240 and also with OEM Poly roofs. For OEM poly roof, install M6 screw and washer (items #2 and #3) through the glass windshield frame, through the ROPS tab and fasten using M6 locknut from backside. The larger thick foam seal (item #12) will be used with OEM poly roof. The large seal will fit in between glass windshield and poly roof. Apply the larger thick foam along the top edge, spanning left to right. (See illustration 1-8).

Installation Instructions (Continued):

7. Center the windshield onto the cab frame and then from rear windshield surface, place the two clamps (item #5) around lower cab frame tubes and fasten with M6 locknuts (item #4) as shown. (See illustrations 1-7 and 1-8). **Note, do not tighten at this step.**
8. For the two upper mounting locations, the screws will pass from front to rear and fastened on back side with M6 locknuts (item #4). (See illustration 1-7)
9. Tighten all hardware to specification.

 = T
6MM FASTENER TORQUE: 7 ft. lbs. (9.5 Nm)

Slide Vent Operation:

10. To open slider vents, slightly loosen the thumbscrew knob (item #6) and move plastic slider as desired in direction shown, then snugly retighten thumbscrew. (See illustration 1-9). **Note:** *Make sure thumbscrew knob is always snugly tight, do not overtighten.*

WARNING: If transporting vehicle in non-enclosed trailer then vehicle must **FACE FORWARD**, or windshield must be removed.

Failure to comply may allow airflow, vibration, or other factors to separate windshield from vehicle and cause an accident, resulting in serious personal injury or death.

Spare Kit PN 28090: Windshield Vent Slide - Single

(Includes plastic slider, metal frame, thumbscrew, flat washer, lock washer, six rivets)

Use and Care Information:

- Check the accessory mounts frequently and retighten hardware if necessary.
- Replace this accessory with a new one if it is damaged.
- Never use petroleum solvents such as gasoline, thinner, benzene, acid or alkaline cleaners.

One Year Limited Warranty

For the period of one (1) year from the purchase date, Kolpin will replace for the original purchaser, free of charge, any part or parts found upon examination by Kolpin to be defective in material, workmanship, or both.

All transportation costs incurred submitting product to Kolpin for warranty consideration must be borne by the purchaser. If Kolpin determines that the product must be returned to the factory for credit, please call 1-877-956-5746 for a Return Merchandise Authorization (RMA) number and shipping instructions.

This warranty does not apply to parts that have been damaged by accident, alteration, abuse, improper maintenance, normal wear, or other causes beyond the manufacturer's control. In order to protect you and your ATV, certain parts of the accessory system and/or hardware are designed to fail when the equipment is over-stressed. Parts that are lost due to loosening and improper maintenance are not covered under warranty. This warranty does not cover removal or reinstallation labor fees of the windshield system and related components.

Peripheral products such as engines, electric motors, and actuators may carry an original manufacturer's warranty. Most hardware is general in nature and is easily obtained locally. Be sure to replace with minimum metric class 8.8 specification.
